Protect Your Right to Buy Cooperatively

"One of the methods used by the fertilizer companies to break up farm organizations was to sell the farmer at a lover price than he could bity through the organization. This low price was not given the farmer until the feder-ation had contracted for its supply, and naturally caused much assausfaction." This statement is made on page 51 of the Federal Trade Commission's report issued March 3, 1923, following an investigation of the Fertilizer Industry.

Why this constant fight to discredit cooperative buying — to make farmers dissatisfied with their own efforts? See Chairman Thompson's report again. On page 9 he says "Cooperative buying of fertilizer has been the most important factor in lowering the price of this important product

This is the real teason why independent manufacturers want to break up cooperative buying. They cannot compete faith with the prices it establishes

You must protect your own rights if you want enoperative buying in an organized was to continue. An early order placed with us will be JOHT ABSNET.

If you are planning to trade-in your present car for a new car; remember these facts:

- 1 When you trade-in your used car for a new car, you are after all making a purchase, not a sale. You are simply applying your present car as a credit toward the purchase price of the new car.
- 2 Your used car has only one fundamental basis of value; i. e., what the dealer who accepts it in trade can get for it in the used car market.
- 3 Your used car has seemingly different values because competitive dealers are bidding to sell you
- 4 The largest allowance is not necessarily the best deal for you. Sometimes it is: sometimes it is not.
- 5 An excessive allowance may mean that you are paying an excessive price for the new car in comparison with its real value.
- 6 First judge the merits of the new car in comparison with its price, including all delivery and finance charges. Then weigh any difference in allowance offered on your used car.

"David Belasco's advice impressed me"

> Walter J. Leather is telling Joyce Todd as they start for an all-day motor jaunt through the Berkshires.

You, too, will find that Lucky Strikes are mild and mellow—the finest cigarettes you ever smoked, made of the finest Turkish and domestic tobaccos, properly aged and blended with great skill, and there is an extra process—"It's toasted"-no harshness, not a bit of bite.

It's toasted'

No Throat Irritation - No Cough.

David Belasco, dean of the American Theatre,

"The voice is to the actor what the chisel is to the sculptor. He must beware of dulling its qualities. Naturally I am vitally concerned about the voices of my players, so I always advise the one cigarette that I discovered many years ago that does not impair control of the subtlest vocal shadings or cause huskiness or harshness. I mean the 'Lucky Strike.' It is the player's best friend."

Wassachusetts Wareh 13 1862 He besan William homest Dever we born at Roburn Massachusette March 13 1862. He besate man of a Chicago ward five times resigning in 1910 and was elected sider man of a Chicago ward five times resigning in 1916 to become index of the supreme court of Cook county. In 1916 Dever become justice of the lilimois appellate court and in 1923 was elected manur of Chicago for the term 1971 1937. He was defeated for reelection by William Hale Thompson.

Mr Dever holds that the tarmer should be given relief and that prohibition enforcement should be taken out of politics. He says it seems to me that the Republican adult istration will be called upon to do somethiax more than talk about it to give the farmers of the country as economic remedy for their prosent lills. With all our boasted prosperite the farmers are not getting from what they produce enough to pay for the production ongot to give the North and East a definite idea in to what it believes it will be able to do about prohibition. As the situation is now no one can be elected to office from alderman to president without making it plain what he thinks of prohibition.

It Pays to Pay More If You Get All You Pay For

What extra qualities are you getting for the two, three, four or five cents more which you pay for "premium" gasoline?

Do you get just a so-called "high test" gasoline? "High" in what test? High gravity, now-a-days, does not necessarily indicate destrable quality*. Do you merely get an anti-knock fuel ... or one which just starts easily ... or which has a certain "end point"?

In DETONOX Gasoline You Get Actual High Quality

You get a fuel which is non-detonating. DETONOX not only has the proper "end point" to readily form the correct dry mixture, but also has the proper "initial" and "intermediate" points to insure instant starting, lightning pick-up, giant power, better trileage.

Why pay a premium for one-or two-desirable qualities when you can get DETONON? DETONON is better seven ways! It pays to gay the few cents more that DETONON costs per gallon, for you
